

COMPACTAR

Stationary Presses

Material	· Aluminium
Control box	· Automatic process · Dwell time · Digital temperature controllers · Digital Timer · Buzzer alarm for end of process · Two-hand control
Pressure	· Two airbags · K7: Max. o.p. 7Kg/cm ² (100PSI)
Heating	· Silicone heating elements T. Max. 185°C (365°F)
Cooling	· Water
Belt width	· Up to 2000mm (other models upon request)
Platen length	· 350, 500, 600 o 700mm
Platen angle	· 90°

Jaw lifting system

Lifting up the upper part of the vulcanizer, even in the widest belts, will never be an issue again.

Easy handling for a single operator

From the two-hand control it is possible to lift up and down the upper part and also supply the air to the pressure bags.

Top safety

3 extra safe systems: Anti-fall of the head and the bolts, anti unforeseen inflation and anti-trapping.

Continuous cycles without a break

Due to the avant-gard design, and the cooling and blow out systems.
